

Vayu: Sources and Evidence

Supporting document, SIH 2026, ByteBrigade. Each entry states what it supports and how Vayu differs. Accessed 28 September 2026.

#	Source	What it establishes	How Vayu relates
1	Office for National Statistics (UK), FOI-2023-1164, 'Aggregate index of air fares methodology'. ons.gov.uk/aboutus/transparencyandgovernance/freedomofinformationfoi/aggregateindexofairfaresmethodology	The UK CPI air fares index collects domestic prices one month ahead, short-haul at three months and one month, long-haul at six, three and one month. Prices are for flights departing on an 'index day'.	Vayu collects one window (21 days ahead), close to the domestic lead time. Multiple windows are on the roadmap.
2	ONS ad hoc release: domestic, European and long-haul airfares consumer prices sub-indices, January 2007 to February 2026. ons.gov.uk/economy/inflationandpriceindices/adhocs/3340domesticEuropeanandlonghaulairfaresconsumerpricesubindicesjanuary2007tofebruary2026	Airfare sub-indices are published separately, on a January = 100 basis, with weights for each sub-index from 2007 to 2026.	Vayu's re-basing step follows the same principle: a defined base period equal to 100.
3	Office of the Economic Adviser, DPIIT: Provisional estimates of Service Producer Price Indices (base 2022-23), Q1 FY2026-27. eaindustry.nic.in/press_release/sppi/sppi_press_release_202608.pdf	India's Air (Passenger) Service Price Index rose from 106.9 (Q4 FY2025-26, final) to 126.4 (Q1 FY2026-27, provisional). Next release for Q2 is scheduled for 25 November 2026.	Official air price measurement in India is quarterly and provider-side. Vayu targets a daily, traveller-facing signal.
4	Open Magazine, 'Air Ticket Prices Up 32%? What India's New Service Inflation Data Really Means for Your Next Flight'. openmagazine.com/india/air-ticket-prices-up-32-what-indias-new-service-inflation-data-really-means-for-your-next-flight	Reports annual inflation of 31.94% in the air passenger category and explains that the Service PPI is not a direct measure of the fares passengers pay.	Motivates a fare-based measure alongside the producer-side index.
